Description

Description

- Enthus is an elastomeric vinyl polysiloxane impression material that provides the clinician with an accurate and reliable impression with exceptional tear strength and stability as well as exceptional accuracy and long term dimensional stability.
- Enthus impression materials feature high fluidity and hydrophilicity with high contrast colors.
- Enthus is a thixotropic material that exhibits minimal increase in viscosity, remaining flowable during working time. As soon as the tray is placed in the mouth Enthus' viscosity will increase immediately.
- Enthus offers a unique combination of high tear strength and very low contact angle.
- Enthus comes with a pleasant mint taste.
- Gluten-Free

Presentations:

- Putty: 2 x 300ml jars & 2 scoops
- Heavy, light and momophase: 4 x 50ml cartridges, Fast Set
